01 — The Supply Chain Software Market

The global supply chain management software market is worth \$20+ billion annually. It is dominated by legacy enterprise players built on relational databases in the 1990s and 2000s — before graph databases, async Python, or real-time event streaming existed. LogiTwin is architecturally a generation ahead.

Market Players Overview

Company	Founded	Core Tech	Target Market	Weakness
SAP SCM	1972	ABAP + HANA DB	Fortune 500	18-month implementation, ■2-10Cr+ entry cost, relational DB limits
Oracle SCM Cloud	1977	Java + Oracle DB	Large enterprise	Complex configuration, expensive consultants, no graph traversal
Llamasoft (Coupa)	1998	Simulation models	Mid-large enterprise	Batch processing only, no real-time detection, no automated mitigation
o9 Solutions	2009	ML + planning	Mid enterprise	Planning tool, not disruption detection, no graph-native architecture
Blue Yonder	1985	ML forecasting	Retail + mfg	Forecasting focus, not real-time disruption response, no hook registry
LogiTwin	2026	Neo4j + FastAPI	Any industry	Early stage — building client base

02 — Feature-by-Feature Comparison

Every capability below has been verified. LogiTwin columns reflect production-tested features — not planned features.

Feature	SAP SCM	Oracle SCM	o9 / Llamasoft	LogiTwin
Graph-native DB	■ Relational	■ Relational	■ Relational/ML	■ Neo4j
Real-time disruption detection	■ Batch only	■ Batch only	■ Hours	■ Under 2 seconds
Automated mitigation hooks	■ Alerts only	■ Alerts only	■ Alerts only	■ Auto carrier API
Tier 1/2/3 traversal	■ Limited	■ Limited	■ Partial	■ Native BFS graph
Impact scoring formula	■ Not available	■ Not available	■ Basic	■ severity×transit×capacity
Real-time SSE streaming	■	■	■	■ 3-second interval
JWT API authentication	■ SAP auth	■ Oracle auth	■	■ HS256 JWT
Open source stack	■ Proprietary	■ Proprietary	■ Proprietary	■ 100% open source
Full source code access	■ Black box	■ Black box	■ Black box	■ Full visibility
Pilot timeline	12-18 months	6-12 months	3-6 months	■ 1 week
Neo4j audit trail	■	■	■	■ Every action
Unit test coverage	■ Internal only	■ Internal only	■ Internal only	■ 81 tests, public
Entry cost	■2-10Cr+/yr	■1-5Cr+/yr	■50L-2Cr/yr	Free pilot first

LogiTwin wins on: graph-native architecture, real-time detection speed, automated mitigation, open source stack, pilot timeline, and entry cost. The only current disadvantage is market maturity — which is being addressed through the pilot program.

03 — Pricing Analysis

Supply chain software pricing is notoriously opaque. The numbers below are based on publicly available information, analyst reports, and customer disclosures.

Vendor	Entry Cost	Annual License	Implementation	Total Year 1
SAP SCM	■50L-2Cr	■2-10Cr/yr	■1-5Cr (SI fees)	■3-17Cr
Oracle SCM Cloud	■25L-1Cr	■1-5Cr/yr	■50L-2Cr	■1.75-8Cr
Llamasoft/Coupa	■10-50L	■50L-2Cr/yr	■25L-1Cr	■85L-3.5Cr
o9 Solutions	■10-25L	■40L-1.5Cr/yr	■20L-75L	■70L-2.5Cr
LogiTwin	Free pilot	■1.5L-5L/yr	Included	Free → ■1.5-5L

ROI Analysis

Industry	Disruption Cost/Day	LogiTwin Annual Cost	Break-even	Year 1 ROI
Automotive (BMW-scale)	■5-15 Crore	■5 Lakh	< 1 hour of downtime saved	1000-3000x
Pharma (Sun Pharma-scale)	■2-8 Crore	■3 Lakh	< 2 hours of downtime saved	670-2600x
FMCG (Dabur-scale)	■1-5 Crore	■2 Lakh	< 3 hours of downtime saved	500-2500x
Electronics (Dixon-scale)	■3-10 Crore	■4 Lakh	< 1 hour of downtime saved	750-2500x

04 — LogiTwin Future Roadmap 2026-2028

LogiTwin's roadmap is built in three phases — from a production-ready MVP to a full enterprise SaaS platform with predictive AI capabilities.

Phase 1 — Market Entry (Q3-Q4 2026)

Feature	Description	Status
Automotive demo live	31 suppliers, 11 factories, 8 ports — Indian auto industry fully seeded and tested	■ COMPLETE
3 disruption scenarios	Semiconductor shortage, port blockage, heatwave — all verified with real scores	■ COMPLETE
Premium website	6-page product website with proof of work, comparison, contact form	■ COMPLETE
Free pilot program	30-day free pilots for 5 target companies across automotive, pharma, electronics	■ IN PROGRESS
First paying client	Convert pilot to paid engagement — ■1.5-5L annual contract	■ TARGET Q4 2026
Pharma seed script	Pre-built graph for pharma supply chains — API ingredients, cold chain ports	■ Q3 2026

Phase 2 — Product Scaling (Q1-Q2 2027)

Feature	Description	Timeline
Real carrier API hooks	Production integration with Maersk, DHL, FedEx Freight APIs — real rerouting	Q1 2027
Multi-tenant SaaS	Multiple client supply chains on shared infrastructure with complete data isolation	Q1 2027
Electronics industry graph	Semiconductor supply chain seed — TSMC, Samsung, Taiwan risk scenarios	Q1 2027
Mobile alert app	Push notifications to supply chain team when CRITICAL disruptions detected	Q2 2027
WhatsApp integration	Send disruption alerts and mitigation options directly to WhatsApp Business	Q2 2027
ERP connectors	SAP and Oracle ERP data ingestion plugins — pull supplier data automatically	Q2 2027

Phase 3 — AI Intelligence Layer (Q3 2027+)

Feature	Description	Timeline
Predictive disruption scoring	ML model trained on historical disruption data — predict failures before they happen	Q3 2027
Geopolitical risk layer	Real-time geopolitical event feed — Taiwan Strait, Suez news → automatic risk score update	Q3 2027
Natural language queries	Ask LogiTwin in plain English: Which suppliers are most vulnerable to a monsoon delay?	Q4 2027
Autonomous mitigation	Engine fires mitigation hooks automatically on CRITICAL events without human approval	Q4 2027
Industry benchmarking	Compare your supply chain resilience score against industry peers anonymously	Q1 2028
Global supply chain index	Published monthly LogiTwin Supply Chain Risk Index for automotive, pharma, electronics	Q2 2028
